## Unique design provides easy access for birds and growers

- Patented feed trough provides **easy access to feed for birds at all stages.**
- **Drinker height is easily adjustable** as birds grow.
- **Step rails allow the grower to easily reach top cages** for bird placement and removal, while protecting lower cages from carts.

---

## Innovative design and exceptional durability in a cage system

- 24" x 26" (610 mm x 660 mm) cages are available in 14" (355 mm) or 16" (406 mm) heights.
- Cages feature 1" square (25 mm square) welded wire mesh.
- **Stands are eight feet (244 cm) apart**, reducing the number of leg stands required.
- The **heavy-duty frame** makes Big Dutchman cages exceptionally durable.
- **Cages are made of quality welded wire fabric, made by Big Dutchman.**

---

## The proven Champion™ Chain Feeding System provides better feed conversion ratios and less mortality

- **Big Dutchman's proven Champion Chain Feeding System** accurately measures feed throughout the grow-out cycle and provides easy access to feed.
- **The patented half-in, half-out feed trough provides improved access:** day-olds can easily get to feed, and the manager can easily access the feed chain from outside of the cage. The hinged grille is raised only once to allow additional access for growing birds.
- The **feed chain** provides uniform feed distribution.
- Available independent drives and hoppers lengthen the life of the feeder.

**Big Dutchman.**
