

Cycle14™

BROILER FEEDING SYSTEM

The Cycle14™ Broiler Feeding System is big news for growers looking for great starts and fast finishes. Proven 14" (356 mm) pans now feature an all-plastic grille with 16 openings, for optimum access to feed. The optional two-piece slide, shown above, enables the pans to flood.

Big Dutchman®

Big news from Big Dutchman— introducing the Cycle14 Broiler Feeding System

Cycle14 control pan

Cycle14 pan without optional feed slides

You'll enjoy many big advantages with Big Dutchman's Cycle14 Broiler Feeding System.

Cycle14 pans are a generous 14" (356 mm). Proven, durable, all-plastic pan assemblies—including grilles—won't corrode and are easy to clean.

Featuring the industry's best control pan

The proven Cycle14 intermediate control pan—widely recognized as the industry's best—makes partial-house brooding effortless.

Cycle14 intermediate control pans can be installed anywhere on the feed line. As birds are moved to non-brood areas, the first control pan can be deactivated, automatically converting to a regular feed pan. Then, activate the control pan that's located further down the line—it's that easy.

The big idea behind great starts

Right from the start, Cycle14 provides easy access to feed. **Cycle14's optional feed slides allow the feed to flood the pan, ensuring that chicks get plenty of feed from day one.** As birds grow, slides are easily moved to cover the flood holes, adjusting the feed to its pre-set level.

Cycle14's low-sidewall pan design lets chicks get to feed from day one, without needing to enter the pan. If they do get into pans, the low sidewall and unique grille design allow them to easily exit.

Easy access to feed for a big finish

Easy access to feed continues as birds grow. **Cycle14 pans feature 16 grille openings that encourage birds to approach the pan head-on, making room for more big birds.**

Pans are locked onto the tube, keeping aggressive birds from tilting pans—and feed—away from other birds.

More big advantages

Cycle14 pans are easy to install and clean. A removable top cap allows the pan assembly to be easily installed on the tube.

Pans and grilles are made of an easy-to-clean, durable plastic. **Fingertab locks and a hinge allow pans to swing down for clean-out.**

We can be a big help

Let a Big Dutchman representative configure a Cycle14 system for you. Call Big Dutchman at (616) 392-5981 or send e-mail to bigd@bigdutchmanusa.com.
